TechNexion
INNOVATORS OF TECHNOLOGY

1. Product Overview

DC Power Jack
Supports the 2.1 x 5.5mm male plug.

USB Locking Holes
Secures the USB connector.

USB Type-C Port
Connects to a computer's USB Type-C port.

Mounting Holes (Top Side)
Secures the adapter.

Mounting Holes (Bottom Side)
Secures the adapter.
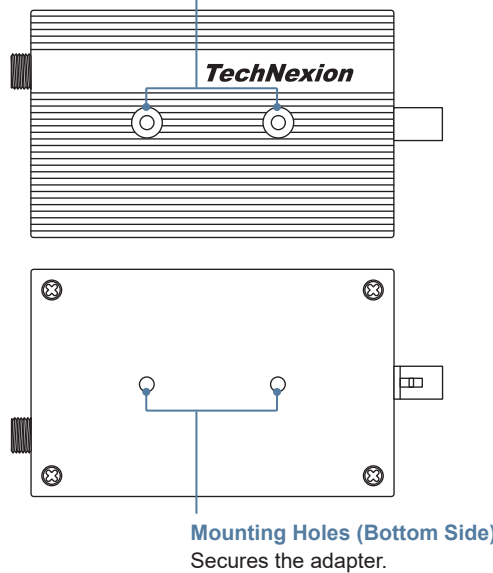

Engineering Mode
Updates the firmware.

**FAKRA Connector**
Connects to a camera.

LED Indicator
Lights up when the power is on.

2. How to Connect the Adapter

1. Connect the adapter to the camera via the FAKRA connector.
2. Connect the adapter to a computer via the USB Type-C port.
3. The LED indicator will light up when the connection and power are ready.

Note: Connect to a DC power adapter (10-30V/2A) with the size fit to 2.1x5.5mm plug if the computer you connected doesn't offer enough power to activate the adapter. Check the LED indicator status again once the extra power is connected.

3. How to Use the Camera

1. Enable the camera software built-in by the operating system or a supported third-party camera application.

2. Follow the software instructions to operate the camera.

• If the messages appear on the screen below, check the following (demonstrated with Windows built-in app):
