

## Product Change Notification (PCN)

October 12, 2022

Dear Customer,

To guarantee smooth supply of our products and coop with COVID-19 supply chain constrains. TechNexion updated the product

This letter serves as a formal product change notification (PCN) for **TEP-0500-IMX7** and **TEP-0700-IMX7**

### Product Change

1. Incorporate a Realtek Ethernet IC as a replacement of the old Qualcomm Atheros component used in previous revision.
2. Change the board-to-board connector between the mainboard and the LAN/Power adaptor board. (no outside mechanical change)

### Hardware Changes to migrate to the new revision product

**Electronics** : Modified B2B connector between the mainboard and the LAN/Power adaptor board  
**Chassis**: No modification.

### Software Changes to migrate to the new Revision Product

The latest software release and patches support the Realtek Ethernet chip and customer will have to update the latest software patches in order to have ethernet functionality. All patches are available on our github download location : [www.github.com/technexion/](http://www.github.com/technexion/)

### Have questions?

Please contact with your TechNexion Representative for assistance with smooth transition to next generation products. Samples of the new part numbers are available in mass production.

Sincerely,

Curtis Lai  
Product Manager
